

SELF-ATTESTATION FOR INDIVIDUALS WHO HAVE A MODERATELY TO SEVERELY WEAKENED IMMUNE SYSTEM AND MEET CERTAIN VACCINATION CRITERIA

If you meet the [criteria](#) outlined by the Centers for Disease Control and Prevention (CDC), you should follow the COVID-19 vaccine schedule according to your age and immune status at the time of eligibility for appropriate dose(s) of the COVID-19 vaccine to stay protected against COVID-19.

Talk to your doctor about the need to get appropriate dose(s) of COVID-19 vaccines based on age, immune status, and timing of administration. Ask about the best timing based on your current treatment plan. This is especially important if you are about to start or restart immunosuppressive treatment.

SELF-ATTESTATION OF A WEAKENED IMMUNE SYSTEM

I attest that I am immunocompromised and am eligible for immunocompromised dose(s) of a COVID-19 vaccine based on the criteria outlined below.

I have any ONE of the following:

- ✓ Been receiving active cancer treatment for tumors or cancers of the blood
- ✓ Been receiving active treatment with high-dose corticosteroids or other drugs that may suppress your immune response
- ✓ Received an organ or islet transplant and I am taking medicine to suppress my immune system
- ✓ Received a stem cell transplant or chimeric antigen receptor (CAR)-T-cell therapy within the last two years or I am taking medicine to suppress the immune system,
- ✓ Moderate or severe primary immunodeficiency (e.g. DiGeorge syndrome, Wiskott- Aldrich syndrome)
- ✓ Advanced or untreated HIV infection
- ✓ Cancers of the blood that are associated with poor responses to COVID-19 vaccines regardless of current treatment status (e.g., chronic lymphocytic leukemia, non-Hodgkin lymphoma, multiple myeloma, acute leukemia)
