important
updates and
resources.

THERAPEUTIC PROGRAM COMES TO A CLOSE

San Bernardino County would like to thank you for participating in the COVID-19 Therapeutic Program and your efforts in combatting COVID-19 on the front lines. Thanks to your efforts, we were able to distribute nearly 65,000 doses of different COVID-19 treatments since the beginning of our program in 2021. You can continue to treat the San Bernardino County community by purchasing Paxlovid and Lagevrio through traditional routes as well as participating in the available Patient Assistance Programs. More information and resources on these programs can be found below. We appreciate your willingness and ability to serve the San Bernardino County community!

VOLUNTEER REPORTING FOR PURCHASED THERAPEUTICS

Any product obtained from the United States Government (USG) must continue to be reported in Health Partner Order Portal (HPOP), as usual, until your supply is depleted or expired. Additionally, the USG has developed a way for providers to report commercial treatment location data voluntarily. This data will be visible in an expanded treatments locator tool which is anticipated to be released in mid-December. As of November 27, sites can voluntarily upload commercially acquired inventory data for Paxlovid and Lagevrio via HPOP. HPOP users can report using their existing accounts, while non-HPOP users can report using the [HPoP Voluntary Reporting](#) website.

COVID-19 Response

Our job is to create a county in which those who reside and invest can prosper and achieve well-being.
